4. In the 21st century, Higher Educational Institutions are collaborating with industries, incubation centres and entrepreneurial agencies to rope in skill courses in order to increase the employability of the students and to curb the menace of unemployment.
5. In the area of sports, the college plans to collaborate with government and non-governmental agencies to hone the skills of our young students with potential to make it big in the field of sports.
6. According to the National Education Policy 2020, which all of us, as stakeholders have accepted and come into force, as part of a holistic education, students are to be provided with opportunities for internships with local industry, businesses, artists, crafts persons, villages and local communities, etc., as well as research internships with faculty and researchers at their own or other HEIs or research institutions, so that students may actively engage with the practical side of their learning and, as a by-product, further improve their employability.
7. It is to be understood that Sao Chang College, which presently has around 600+ students, only 30 percent may pursue Higher Studies of specialization out of which a small percentage may be able to obtain government jobs. The College should equip students with multiple options, which is why there is an urgent need to collaborate with various agencies so as to offer skill courses, vocational courses, value added courses and so on.

Therefore, it is my earnest appeal to the leaders of Tuensang Village Chongpho Citizens to show your solidarity and cooperation in the larger vision of the College which, today, may seem like a tiny step that the College is taking, but which is designed for the betterment of the students and to rid the institution of mediocrity.

Nevertheless, if after perusing the above reasons, the TVCC so decide to reaffirm its earlier decision, the College is every ready to comply with your wishes. I remain

Yours Sincerely,

(Dr. Lanurenla)

Principal
