

# DEPARTMENT OF CHEMISTRY

JUNE 2022- MAY 2023

| PLAN OF ACTION                                                     | ACTION TAKEN REPORT                                                                                                                                                                                                                                                                        |
|--------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| To continue with chemistry week during the month of September 2022 | Chemistry week conducted. Soft copy and hardcopy of report submitted to IQAC on 13/10/2022.                                                                                                                                                                                                |
| Project on Chemistry Lab Manual                                    | This project was proposed during June 2020-May 2021. However, due to implementation of CBCS and NEP 2020 from 2022 and 2023 respectively. The Contents needs to be changed. Therefore, instead of Chemistry Lab Manual. Project for virtual Lab is Proposed based on the updated syllabus. |
| National Science Day commemoration                                 | Commemorated along with other science department.                                                                                                                                                                                                                                          |
| To come up with some mechanism for waste disposal method           | As mechanisms for proper waste disposal method needs proper research and also its implementation needs financial support, therefore this work is further carried forward to the next academic year.                                                                                        |
| To install exhaust fan and fire extinguisher in the chemistry lab  | Seeking for Financial Assistance                                                                                                                                                                                                                                                           |
| Construct wooden almirahs/racks for keeping chemicals              | It was observed that the racks/almirahs were sufficient after proper arrangement.                                                                                                                                                                                                          |

## FUTURE PLAN OF ACTION FOR THE PERIOD JUNE 2023 TO MAY 2024

1. To continue with chemistry week during the month of September 2023
2. To conduct Summer project during summer Vacation
3. To Commemorate Science Day with other Science Departments, Feb 2023
4. To come up with some mechanism for waste disposal method – Will ask for some finance from either authority/IQAC and Composting pit will be constructed and maintained along with other science departments
5. Project Zero in collaboration EVS Department
6. To continue with the process for installation of exhaust Fan and Fire Extinguisher in the chemistry Lab.
7. A 3-year project for Virtual Lab will commence from the present academic year.
