

REPORT
COMMUNITY EXTENSION SERVICE REPORT

On May 4, 2024, Sao Chang College warmly welcomed 34 eager students and 4 accompanying staff members from GMS Chendang, Tuensang for a day filled with immersive educational activities as part of their Community Extension Service. The visit commenced with engaging hands-on sessions in the science laboratories, where students delved into various experiments. They explored the intricate world of microscopy, identifying microscopic organisms and cell structures. In the freshwater aquarium section, they observed diverse aquatic life forms, learning about their habitats and behaviours. Moving on to the flora and fauna samples, students examined a variety of preserved specimens, deepening their understanding of biodiversity. Practical lessons in basic computer setup and troubleshooting followed, equipping them with essential IT skills. Demonstrations on the magnetic effect of electric currents and light dispersion through prisms captivated their scientific curiosity further.

The educational tour continued with visits to the Tribal Museum, where students gained insights into the cultural heritage and traditions of local indigenous communities. At the college library, they explored an extensive collection of books, journals, and digital resources, discovering new avenues for academic research. In the Computer Laboratory, students engaged with cutting-edge technology, witnessing ongoing projects and gaining insights into the application of computer science in various fields.

A highlight of the day was the hands-on experience in floriculture, part of the RUSA vocational course offered by the college. Students actively participated in planting and nurturing flowering plants, guided by instructors in sustainable gardening practices and modern techniques in floriculture. As a memorable takeaway, the visiting students received vegetable saplings cultivated by the 6th Floriculture Batch through innovative recycling methods, encouraging them to embrace environmental sustainability.

Overall, the visit not only broadened the students' scientific knowledge and cultural awareness but also inspired them to explore future educational and vocational opportunities in fields ranging from science and technology to environmental conservation and cultural studies.

Sub: GMS Chendang village study tour to Sao Chang College

Respected Madam,

As a part of our academic plan, we want to visit your College for local study trip on 4th May 2024 (Saturday). This study tour will enable the students to gain broader knowledge on varied subjects in general, also the facilities and opportunities available in the College in particular, instilling them towards pursuing quality education.

In this regard, I request your esteemed office to permit us to visit your Institute and provide a learning opportunity for the school students.

Some of the place of interest:

- a) Library
- b) Museum
- c) Floriculture
- d) Science laboratories

Thanking you.

Sincerely,

Yemlonghaba, M. So., B. Ed.

Sao Chang College engages with government middle school students

Students of Government Middle School Chendang at Sao Chang College, Tuensang, on Saturday.

Dimapur, March 4 (EMN): Sao Chang College, Tuensang, welcomed students from Government Middle School Chendang as part of

its college extension service on Saturday.

According to a press release, visiting students were introduced to science labora-

tory facilities and given demonstrations of basic practical knowledge. Demonstrations included basic microscopy, freshwater aquarium main-

tenance, examination of flora and fauna samples, basic computer setup, measurement methods, the magnetic effect of current, and light dispersion through a prism.

It was followed by a visit to the tribal museum, library, and computer laboratory.

The students also had firsthand experience of floriculture, which is maintained under HUSA, an ongoing vocational course provided by the college.

Vegetable saplings prepared through recycling methods by the 6th floriculture batch were also distributed to the visiting school students. Altogether, 34 students and four staff members from the school participated.
